THE COMPANY

Established in 2006 Amptron Electrical is a Nottingham based company which, through growth, now offers various Specialist and Mechanical Services.

In March 2012 Amptron merged with a mechanical business to create the sub-division Amptron Mechanical Services. We are now able to offer in-house design, estimating, facilities management and contracting in electrical, mechanical and building services

Amptron undertakes work from a wide variety of clients including domestic properties, schools, universities, fire services, police authorities, the NHS, commercial premises and industrial sites.

Amptron Electrical & Mechanical can offer a Design/ Installation/ Commissioning service or a complete package incorporating any of the above. Our Facilities Management team offers packages in Repairs/ Maintenance/ Emergency Call Out to suit each individual clients requirements.

Amptron offers a 24/7 Emergency Call Out Service to our clients, we have an engineer on standby for our of hours situations.

Our aim is to offer our clients good value and support as well as striving to achieve a high standard of work in all areas of our company.

Amptron currently has three divisions:

- Electrical Services
- Mechanical Services
- Facilities Management

WE DESIGN

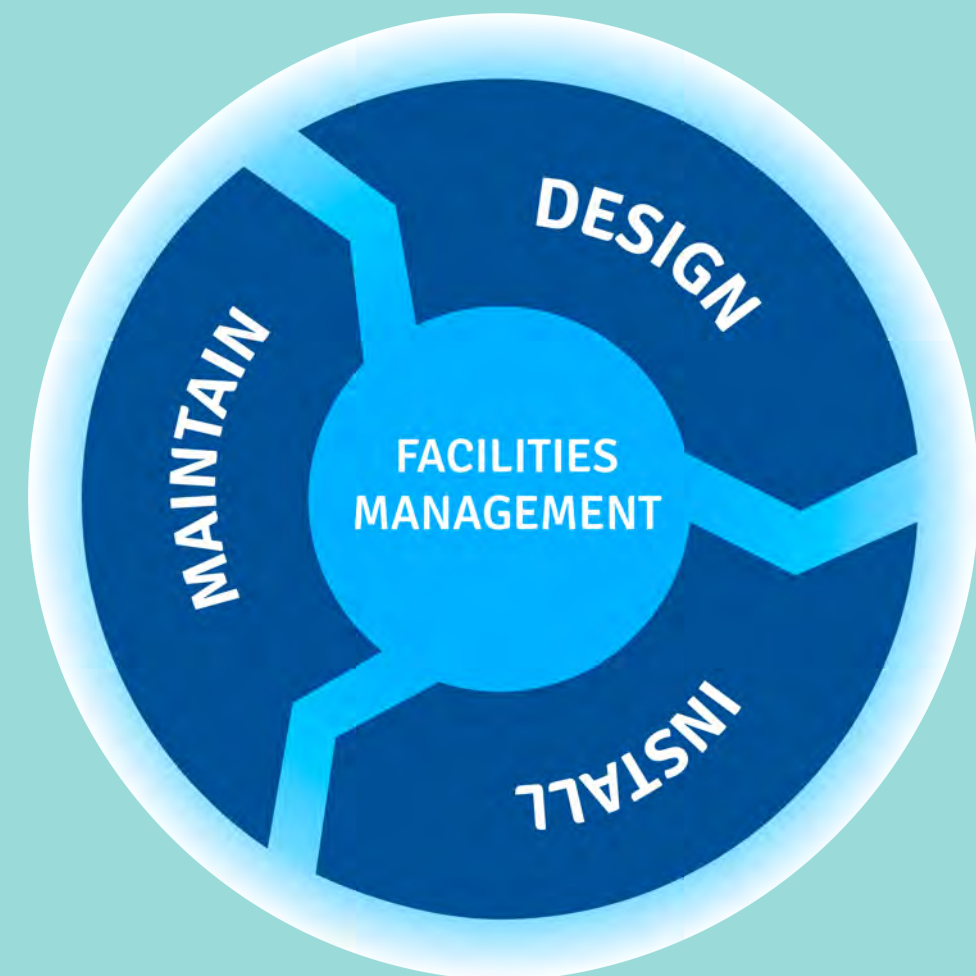

Our experience in the electrical and mechanical building services industry allows us to offer detailed design from concept through to completion.

We have a variety of experience in all major business sectors and can tailor the design to meet your specific project requirements.

We not only have experience in general Electrical and Mechanical design, we also have in-house knowledge of

specialist design services for example CCTV, Fire Alarm and Intruder Alarm. We are able to design, install and commission projects from start to finish.

Amptron Electrical over the year have designed various projects from £10,000 up to £2,000,000.

WE INSTALL

Ampton's installation department covers all aspects of today's demanding environment.

Through many years experience of working closely with clients, we have always delivered projects on time and to the highest of standards. The installation and management teams are able to control these works and we are proud to be able to do most projects with in-house trained staff, minimising the amount of sub-contracted works.

We have dedicated engineers who cover all aspects of installations: from the more conventional electrical and mechanical to more specialised installations.

WE MAINTAIN

Ampton's Facilities Management Department can offer a turnkey Service Package for all aspects of today's building requirements.

The services undertaken by Ampton include specialist items such as:

- Oil Interceptor Alarms
- Nurse Call
- Public Address
- Emergency Lighting
- Boilers
- Under Floor Heating
- Fire Station Call Out Equipment
- Refuge Alarms
- Fire Alarm System
- Ventilation
- Air Conditioning and more....

We tailor a service package to suit your requirements.

All service reports can be uploaded to the Ampton Web Portal allowing our clients to download them at any time. Our dedicated service engineers are stocked especially for various types of servicing works so to offer our clients an 'all in one' service with minimum down time and need for costly return visits.

FACILITIES MANAGEMENT

Amptron Electrical is not only an Electrical and Mechanical contracting company; it is also a Facilities Management company.

We can offer our clients a ‘one stop shop’ making sure all aspects and requirements are covered. Through the companies web based portal, the facilities management side of the business gives the client a very easy method to log faults which are then monitored and tracked through to completion.

Clients trust Amptron to keep all sites up to date with the latest regulations and legislation.

Amptron engineers are multi-skilled offering clients an overall more efficient approach by less people being required

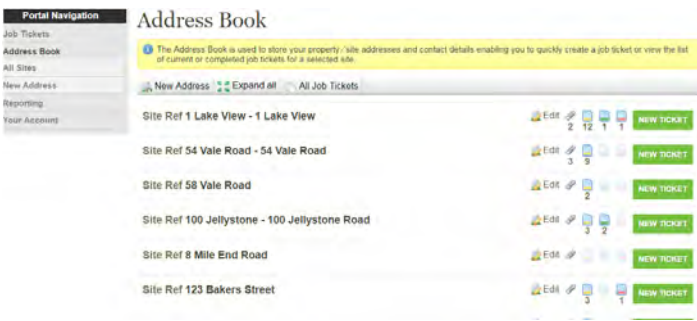

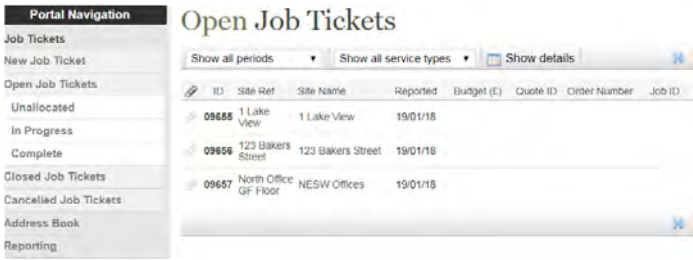

Clients in a maintenance contract with Amptron are all covered by our 24/7 emergency call out service. As part of all of our maintenance contracts, Amptron include access to our 24/7 call out service.

All Amptron vans are fully equipped with various spares to make sure all defects are completed where possible with minimum down time and reduced costs.

Have you seen our Web Based Portal? Call today to request a free Demonstration!

Our portal is capable of storing various site addresses, making it easier to keep track of all requested works.

Each time a job is logged an automatic email is generated, and as the Amptron team update the portal through every step of your job progress you get notified via email also.
